Wednesday, April 24, 2019

## Senior Full-Stack Software Developer

### Overview

Our software start-up is seeking a Sr. Software Developer to be responsible for all phases of the development lifecycle. QuadraDot is a remote female-led team offering flexible hours to the perfect candidate. We are seeking an experienced individual that can ensure project standards with quality and integrity.

### Responsibilities

- Maintain and improve the performance of existing software
- Develop, test and implement new software programs
- Clearly and regularly communicate with management and technical support colleagues
- Test, maintain and recommend software improvements to ensure strong functionality and optimization
- Facilitate root cause analysis of system issues, review new and existing code and/or perform unit testing
- Resolve complex technical design issues
- Development of technical specifications and plans based on stakeholder and client requirements
- Make good technical decisions that provide solutions to business challenges
- Compile timely, comprehensive and accurate documentation and or reports as requested
- Possess strong problem solving and decision-making skills while using good judgment

- Multi-task and change from one task to another without loss of efficiency or composure

## Education/Experience

- 5+ years' experience in web and software development
- Demonstrated proficiency of web technologies, such as HTML, CSS, JavaScript, jQuery/AJAX, MySQL
- Good knowledge of relational database systems and cloud services
- Ability to work independently and multi-task effectively
- Strong logical thinking and attention to detail
- Willingness to learn and stay up to date on technological developments in the industry

## Next Steps

- Submit your resume and cover letter as a .pdf at [quadrادot.com/careers](http://quadrادot.com/careers)
  - Include samples of your work in the wild
  - Include a proposal for your dream software or web application
